## *The Alternative Choice!*

### Why choose us

- **High quality** turbocharger spare parts for **all Brands**, Types and Specifications.
- All spare parts and services are provided with a **12 month warranty**.
- Our location gives us the competitive advantage to offer **Tax-Free** spare parts.
- Service engineers are available to travel at one call immediately to the vessel with the **minimum transportation cost**.
- We offer **full range services 24/7**, 365 days a year, with all our Partnerships Service Stations around the globe.

### About us

**Overseas Turbo Systems S.A.** is an independent, newly established company located in Saint Vincent and the Grenadines in Caribbean Sea which was founded by Europeans and Americans marine turbocharger expert engineers. Our purpose is to improve constantly the level of our services and products' range, according to marine market high standards and developments.

Our flexible repair, overhauling and maintenance concept allows us to customize our services according to your requirements, minimizing the travel time and reacting at short notice, due to the assistance of our worldwide network of qualified service engineers.

## SPARE PARTS

OEM **spare parts** of high quality and aftermarket turbocharger **units**, are **offered 50% below** compared to the prices of the corresponding factories-manufacturers.

Our integrated freight forwarding service system has the availability to execute shipments **24/7, 365** days a year, in order to minimize delivery time.

**All spare parts are provided with a 12 month warranty.**

**ABB**

**IHI**

# SERVICES

## OVERHAULING

We undertake overseas overhauling for **all T/C types and manufacturers**. It can be performed **either on board**, or at any cooperating **service station nearest to you**, according to your vessel's schedule.

Our worldwide network of service engineers is able to give prompt and efficient solution to any turbocharger problem that may arise **24/7, 365 days a year**. Since we are always giving **priority to the customers' needs**, we are aiming to serve any vessel around the world in order to ensure its turbocharger's safe and proper operation, minimizing potential engine downtime.

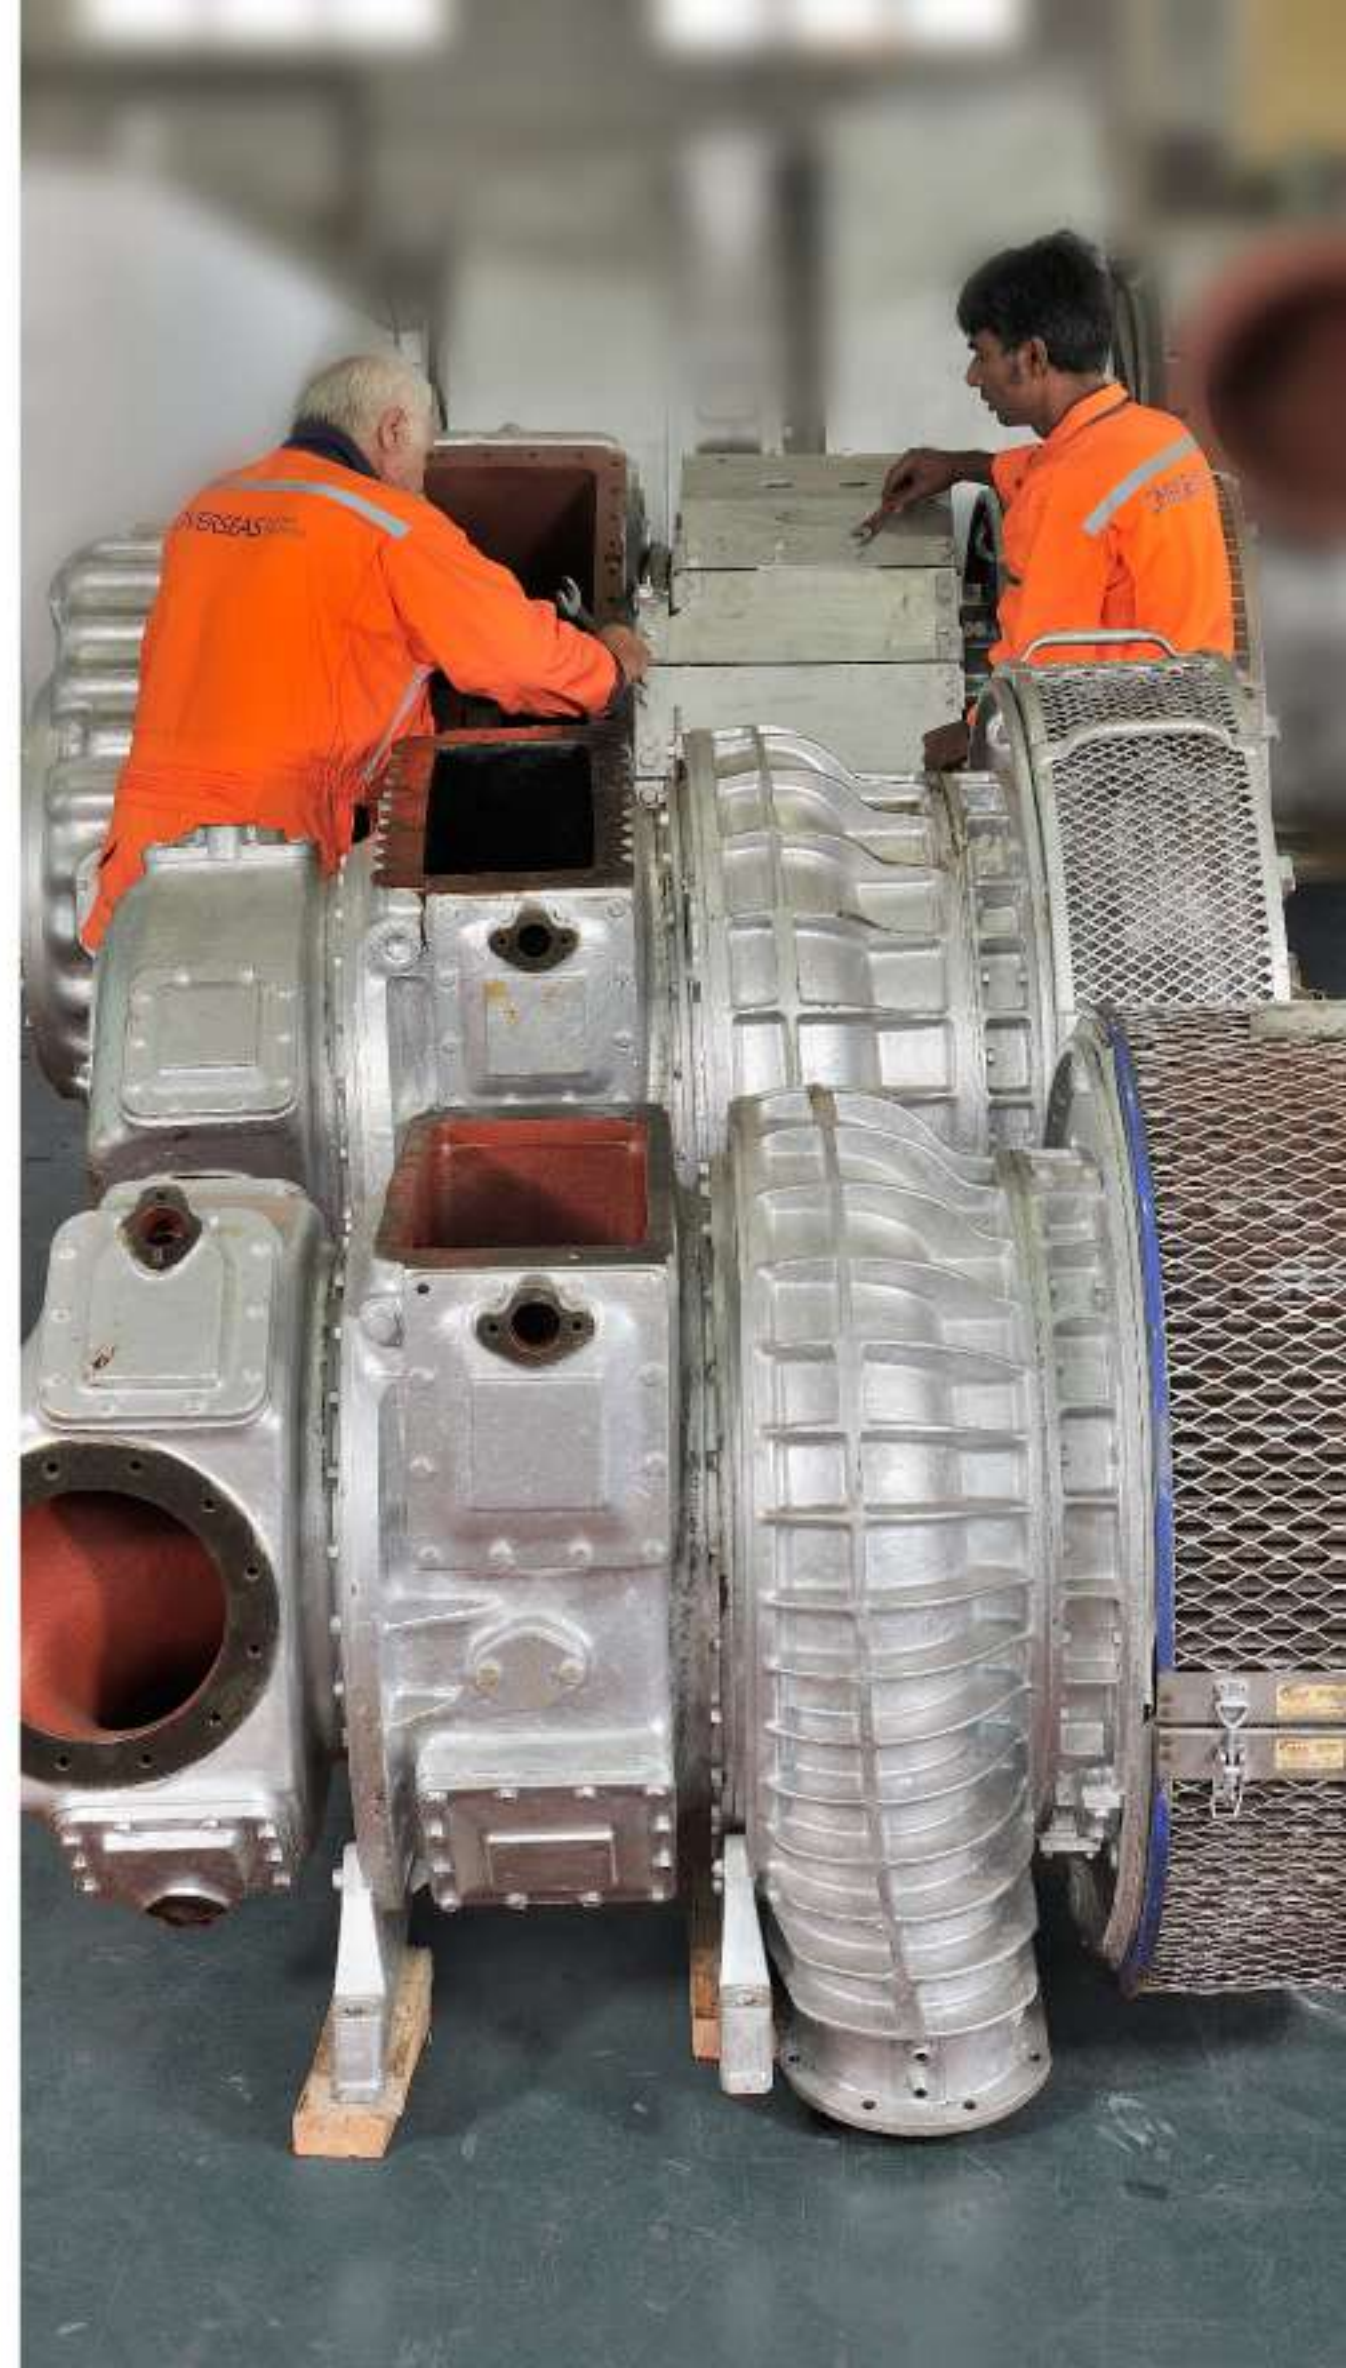

## RETROFIT

Overseas Turbo Systems S.A. has the necessary technical **knowledge and experience** to recommend the best possible solution for **replacing older turbo-charger types with new T/C** units of modern technology.

## OTHER SERVICES

Our worldwide partner's network is able to assist you locally at any port with the following state of the art services:

- Dynamic Balancing of Rotor Shaft
- Re-blading
- Recondition of Spare parts
- Sandblasting
- Wall thickness measurements
- Welding
